It is an ingredient in wood treating chemicals to protect against mildew and rotting. In industrial applications, Old Bridge Copper Sulfate finds use in production of chemicals, dyes and pigments, in the steel industry for pickling and plating and as a floatation reagent in recovery of zinc and lead in mining.

Old Bridge Copper Sulfate Fine Crystals and Coarse Crystals are registered with the Environmental Protection Agency for pesticide applications (EPA Reg. No.46923-4). Please refer to the EPA approved labels for specific instructions.
